## JOB GRID

### CIVILITY

Continued from A1

the health of America's entire public system is threatened.

"If you have greater civility, you're more likely to resolve the greater issues of the age," Leach told the Deseret News during a telephone interview this week. Leach will speak in Utah tonight as part of the Utah Humanities Council's 22nd Annual Human Ties Awards ceremony.

"We have foreign policy issues with dramatic significance of the moment and we have domestic challenges that are graver than we've had since the Great Depression and it will take people working together to make these things right. That doesn't mean there aren't strong cases for more conservative concerns ... and also certain liberal concerns ... but we have to resolve them in ways to make clear there is a better future for the next generation. And this is going to take a lot of people working together," he said.

Leach, who spent 30 years as a Republican congressman representing Iowa in the U.S. House of Representatives

before his appointment by President Barack Obama to the NEH last year, will speak 6 p.m. at the Salt Lake Main Library auditorium, 210 E. 400 South, in conjunction with his 50-state American Civility Tour launched in November.

Though Leach refers in his speeches to early disputes in American politics that were uncivil — U.S. Vice President Aaron Burr firing his dueling pistol early one morning in 1804 at former U.S. Secretary of the Treasury Alexander Hamilton, mortally wounding him; and South Carolina Congressman Preston Brooks beating Massachusetts Sen. Charles Sumner with his cane in 1856 until it broke are examples — he says the current political atmosphere is "bordering on a civility crisis at home and a civilization crisis abroad."

"We have all kinds of people calling each other communists and fascists, and if you go to the meaning of these words in American history, these are words that summoned Americans to war and strike at the heart of American values, and if they are used in a certain way they can not only reflect the vision of

a polarized society but they can impel violence if we're not careful," Leach said.

Death threats to lawmakers embroiled in the health care vote, and raucous town hall meetings on the subject are recent national examples. A few years ago when George W. Bush was still president, he was also likened to Hitler and accused by senior legislators of starting the Iraq war to gain political advantage.

In Utah, some community activists and political analysts say the recent defeat of Sen. Bob Bennett at the state Republican convention was uncivil. Bennett was not available to comment for this story, but he has called the political environment surrounding his defeat "toxic." Boos, jeers and delegates jumping up and down for joy accompanied the announcement of his loss.

Incivility can be manifested "in the language, the tone, the shouting and the red faces and the malicious glee at someone else's discomfiture," said Alexander Morrison, executive director of the Alliance for Unity in Salt Lake City. "It struck me that in dealing with Sen. Bennett that there were those that

took an unholy glee at making him feel that he wasn't wanted, and I think that was unfortunate."

Determining what qualifies as civil or uncivil behavior in the public arena is an ambiguous task, said Republican Senate candidates Tim Bridgewater and Mike Lee, who face a June primary to determine which one will be on the November ballot, hoping to replace Bennett.

Civility in separating issues from people when discussing differing opinions is a precursor to compromise and progress, and it's a necessity, Lee said.

But public protests and being involved are just as important, Bridgewater said.

"I think by and large the ability to protest is as American as apple pie and can be done very civilly," he said. "People must speak up."

But they must be careful about what they say, says BYU political science professor Kelly Patterson. More people are paying attention to politics these days because of more easily accessible media. The average person is turned off by shrill politics, he says.
